MEDIA STATEMENT

27 November 2024

Gauteng government improving the lives of Gauteng residents by streamlining essential services

In a display of efficiency and coordination, the Gauteng Provincial Government on Wednesday, 27 November 2024, launched multiple service delivery programmes, aimed at addressing pressing needs across various sectors.

This synchronized initiative showcased the government's commitment to improving the lives of Gauteng residents by streamlining essential services, from infrastructure upgrades, and healthcare access to strengthening crime-fighting efforts.

Adopt and Protect a Robot

The provincial government launched the "Adopt and Protect A Robot" campaign, at Fourways Mall, Johannesburg. The campaign is a public-private initiative to create a strong partnership between the government, private sector, and local communities to tackle traffic congestion, road infrastructure vandalism, and lawlessness. The partnership seeks to keep traffic signals running smoothly with backup power from local businesses and protect them from vandalism, cable theft, and crime.

SAPS vehicle launch

As part of the Gauteng Provincial Government's commitment to strengthen crime-fighting efforts, Premier Panyaza Lesufi oversaw the handover of two hundred and nine (209) police vehicles to VISPOL and Detective sections at Gauteng Stations to increase police visibility and police response across the province.

Climate change indaba

The provincial government also kicked off a two-day climate change indaba to outline the vision for the Gauteng City Region on climate change. It will also profile and showcase Gauteng City Region's climate change response efforts by various role players across government, the private sector and civil society. This aligns with the constitutional mandate of protecting the environment for present and future generations.
