

**GAUTENG PROVINCE**

HEALTH  
REPUBLIC OF SOUTH AFRICA

## **MEDIA STATEMENT**

**THURSDAY, 27 JANUARY 2022**

### **GAUTENG CONFIRMED COVID-19 CASES AND ADMINISTERED VACCINATIONS DISTRICT BREAKDOWN**

The total number of confirmed COVID-19 cases in Gauteng as at 26 January 2022 sits at 1 163 511 with 1 135 554 recoveries and 20 415 deaths.

A total number of 2168 people are currently hospitalised in the public (1102) and private (1066) facilities.

A total of 8 271 152 COVID-19 vaccinations have been administered in the province as at 26 January 2022.

As at 26 January 2022 a total number of individuals vaccinated is 5 145 074 and individuals fully vaccinated sits at 4 302 028.

All persons 12 years and older are encouraged to visit their nearest vaccination site to receive the jab. Getting 70% or more of the adult population vaccinated will minimise the impact of the coronavirus. This will also help us return to the things we love such as attending sporting, cultural, religious and entertainment events of our choice safely.

The public is further reminded that those who received a two-dose vaccine need to return for the second dose at 42 days. All Gauteng sites both private and public accept walk-ins whether people are registered on the EVDS or not.

The Department calls on members of the public to continue adhering to non-pharmaceutical interventions by maintaining a safe physical distance, wearing a mask, washing our hands regularly with soap and water or using an alcohol-based sanitiser and avoiding large gatherings.
